

Centen

ALEWIFE OR BRANCH HERRING,

[*POMOLOBUS PSEUDOHARENGUS*.]

Learn how the Restoration of the Mill River will Benefit Fish and Aquatic Life

RESTORING DIADROMOUS FISH* TO CONNECTICUT AND THE MILL (RIPPOWAM) RIVER

A presentation on the potential for restoring fish runs to the Rippowam,
how to do it, how the dam removal fits into these plans
and what has been accomplished elsewhere in Connecticut.

Steve Gephard, Fisheries Biologist
In Charge of the Diadromous Fish Program
Inland Fisheries Division
Connecticut Department of Environmental Protection

Thursday, November 19th, 2009 at 6:30 PM
Stamford Government Center, Senior Center Auditorium
888 Washington Boulevard, 2nd Floor

**Diadromous fish need both salt and freshwater to survive.*
